**Getting Started - Inflight (Android)**

1. Go to Google Play, download and install the GigSky App.
2. Allow GigSky to access the device's location.
3. On the next screen, type 'Inflight' as your plan location and select your plan.
4. Create your account.
5. Add your payment method.
6. Purchase your Inflight data plan.
7. Next, a pop-up will ask if you'd like to switch to the GigSky network. <span style="color:red">Select **Cancel** since you do not want to turn on your Inflight plan until you reach 20,000 feet.</span>
8. Once you reach 20,000 feet, go to Settings > Mobile Network > select **GigSky Plan 5** and turn Roaming **On.**
9. Tap Advanced Settings, select Access Point Names, select **gigsky.**
10. Connect and enjoy!
11. To top up, select **top up your plan** on the data tracker.
