

Getting Started - Inflight (iOS)

1. Download the GigSky App on the App Store.
2. Select **Allow** to let the GigSky app use your location services.
3. Select **Allow** to let the GigSky app send notifications (this is required to send you information when your data plan is running low).
4. On the next screen, type 'Inflight' as your plan location and select your plan.
5. Create your account.
6. Add your payment method.
7. Purchase your Inflight data plan (you can use Apple Pay).

Next you will create a label for your plan and assign a line type. iOS requires you to assign a line type at this stage, but this is only temporary. Once you hit 20,000 feet, you will reassign your **data plan line** and initiate your **Inflight plan**.

1. Select **Copy Label** to set your custom label as **GigSky Plan 5**.
2. Select Continue.
3. Select Continue.
4. Next, you will see a **Cellular Plan Labels** screen. Select the **Secondary** label and paste the copied label, **GigSky Plan 5**. Select **Continue**.
5. Next, you will be asked to assign a plan to your Default Line. Select **Primary**; this will keep your primary phone number as the default line, select **Continue**.
6. Next, you will be asked to Add iMessage, FaceTime and Apple ID to a plan. Since you do not want to use your Inflight plan immediately, Select **Primary**; this will allow you to continue using your regular cellular data prior to your flight. Select **Continue**.
7. Next, you will be asked to assign a Default Line for **Cellular Data**. Since you do not want to use your Inflight plan immediately, Select **Primary**; this will allow you to continue using your regular cellular

data prior to your flight. Make sure that **Allow Cellular Data Switching** is toggled **OFF**. Select **Done**.

8. Once you reach 20,000 feet, go to Cellular or Mobile > Cellular Data and select **GigSky Plan 5**. Under **Cellular Plans**, turn **GigSky Plan 5 On** and start using data!
9. To top up, select **top up your plan** on the data tracker.

Things to Note

- If you are an existing GigSky customer **without** a GigSky Plan 5 label, you will need to purchase your plan and install the label before your flight.
- If you are an existing GigSky customer with a GigSky Plan 5 label, all you have to do is select the Inflight plan once you reach 20,000 feet and connect!
- Be sure to keep your GigSky Plan 5 label so you can make additional purchases in the future.
